PROFESSIONAL SUMMARY

Detail-oriented, customer-focused IT Support Technician and cybersecurity enthusiast with experience in troubleshooting hardware, software, and network issues across multiple platforms. Skilled in system administration, user support, and cybersecurity best practices. Adept at delivering technical solutions that improve system reliability and user productivity. Strong communication skills and a passion for problem-solving in fast-paced environments.

SKILLS

- IT Infrastructure Support
- System Stability & Uptime Optimization
- Hardware & Software Troubleshooting
- Network Administration (LAN, Wi-Fi, TCP/IP)
- Endpoint Management & Device Configuration
- Data Backup & Recovery Procedures
- Cybersecurity & Antivirus Management
- Active Directory & Microsoft 365 Administration
- IT Asset & Inventory Management
- Incident Logging & Documentation
- System Monitoring & Preventive Maintenance
- User Support & Technical Assistance

EXPERIENCE

IT intern

Avenue Group

June 2025 — Dec 2025, Nairobi, Kenya

- Provided first-line IT support to 50+ users, resolving 95% of hardware, network, and system issues within SLA timelines.
- Installed, configured, and maintained desktops, laptops, printers, and enterprise applications to ensure operational continuity.
- Maintained LAN and Wi-Fi connectivity, troubleshooting TCP/IP and printer network issues to minimize downtime.
- Administered user accounts and permissions in Active Directory and Microsoft 365 to ensure secure system access.
- Performed routine system updates, patch management, and antivirus monitoring, strengthening endpoint security compliance.
- Supported internal systems to ensure uninterrupted data flow and system responsiveness.

- Assisted in routine data backups and verified backup integrity to prevent data loss.
- Maintained inventory records for 200+ IT assets, improving equipment tracking accuracy by 25%.
- Documented incidents, resolutions, and system configurations to maintain service reliability and audit readiness.

IT intern

County Government of Nyeri January 2024 — April 2024, Nyeri, Kenya

- Troubleshoot hardware, application, and connectivity issues, maintaining 99% system availability across departments.
- Installed and configured operating systems, office applications, and network printers.
- Conducted preventive maintenance and system health checks to improve infrastructure reliability.
- Supported database and internal system updates to ensure accurate data capture and uninterrupted workflows.
- Assisted in maintaining cybersecurity practices including secure credential handling and antivirus updates.
- Maintained detailed service logs and technical documentation for operational tracking.
